Dr. George B. Bopp
Chairman, Department of Biology
The Principia College of Liberal Arts
Elizabethtown, Illinois

Dear Dr. Bopp:

Your research proposal for a study of HUMAN ECOLOGY has been carefully considered by various segments of the Agency in relationship to their non-governmental research programs for the coming fiscal year. I regret that the Agency at this time cannot consider sponsorship of a study in the field of human ecology. Should our requirements in the future indicate a need for this type of external research, we will be happy to get in touch with you.

We appreciate your interest in the research activities of the Central Intelligence Agency, and I regret that the Agency is unable to consider favorably sponsoring your project. The Project Proposal and related documents you forwarded to [redacted] are returned herewith.
